The Friends of Fisher House Orlando is a registered 501(c)3 non-profit organization established solely to support the building of a Fisher House at the new Orlando VA Medical Center in Lake Nona. The Orlando Fisher House will provide assistance to Central Florida military Veterans and their families. This committee was formed to honor our American service members and their families who have stepped forward to defend our country and the ideals for which we stand...at great sacrifice to themselves and their families. After our heroes return home, it is our sacred obligation to serve them as well as they have served us. Over the past 25 years, the Fisher House Foundation has helped uphold this promise by extending comfort and security to 307,000 families while our wounded, injured or ill warriors receive essential medical care.
