

Here's what other companies like yours are saying about their M&S certified student interns!

"...the students were unbelievably knowledgeable and talented. We've used them on a variety of programs, exposing them to many technical challenges."

".. when we hire them as full-time employees, they'll be able to support our business, look at how that simulation works, and how we can create these innovative solutions for the future."

"...we believe it's important that companies partner with educators to produce the next generation of scientists, technology professionals and engineers. Fostering these skills helps not only our local communities, but our country as well."

you had the chance
to hire and begin
developing your
workforce of
tomorrow?

Developing Your Future Team Members

Sometimes hiring student interns can feel daunting — the vetting, training and preparation can be challenging to work into your normal job responsibilities.

When you hire students who are certified in Modeling and Simulation (M&S) by the National Center for Simulation (NCS), you're not only effectively managing workflow to meet your company's immediate objectives, but maybe more importantly, you're identifying and developing your future team members and leaders.

WE SPEAK SIMULATION

How Certification Happens?

NCS developed a four year high school M&S curriculum, framework and standards that were approved by the Florida Department of Education in 2015. In 2017, the post-secondary framework and standards were approved, allowing for M&S courses to be offered at the technical college level.

As a nationally recognized industry group, NCS is authorized to award certifications nationwide, and has teamed with Certification Partners to act as the testing agent. Students and teachers can register, regardless of their location, and take the test online. Additionally, if any state provides career and professional education funding, the state can fund the exam.

M&S Certification provides students with a valuable skillset to qualify for internships and entry level positions in the M&S industry.

Helping Your Business and Workforce Grow

The M&S certification offers businesses like yours the opportunity to meet and hire student interns who are highly trained and fully capable, and have that extra layer of knowledge and ability they gained through their certification.

Start looking for your employees of tomorrow. Seek out strong candidates that you can mentor and support as they approach graduation and post-secondary education, building a relationship that will be beneficial to your business, as well as contribute to the student's professional growth.

The benefits:

- Identifies future employees who have a firm foundation and interest in M&S
- Ramps up your company's productivity as they hit the ground running
- Improves retention rates as they adapt to your company's culture
- Offers a cost-free, searchable pool of talent at your fingertips
- Gives fresh, multi-generational perspectives into new ventures
- Provides you inexpensive, but highly talented labor
- Gives back to your community by advancing the talent pool and investing in the simulation professionals of the future
